

## **Put the Sugar Down**

Cookin's one thing you can't fake / The dishes never lie  
So while you're wondrin' what to make / Let your 'magination fly  
When you're ready for a feast / Grab the pan, make sure it's greased  
Fry it up fast or simmer it slow  
Put the sugar down where I showed you  
Put the sugar down where I showed you

The sweetest things in life are free / Take them as they come  
Mangoes plucked right off the tree / Sarsaparilla gum  
Like that honeysuckle weed / You're born with everything you need  
You can learn the spices as you go  
Put the sugar down where I showed you  
Put the sugar down where I showed you

Take your time, you don't have to start with a black truffle soufflé  
Cuz when it falls you won't want to eat it anyway

Love's another thing you can't fake / Kisses never lie  
You gotta give before you take / So at least give it a try  
When you're ready for a treat / Jump on in with both your feet  
Kick it up or take it slow  
Put the sugar down where I showed you  
Put the sugar down where I showed you

**BREAK**

Somebody's bound to break your heart someday  
That's all right, the best part of love is the start, so they say

Love is one thing you can't fake / Kisses never lie  
Before you grab that wedding cake / Try some cherry pie  
And if the sweet defeats the tang / Sign up for the whole shebang  
March down the aisle or go elope  
Put the sugar down where I showed you  
Put the sugar down where I showed you  
Put the sugar down, put the sugar down, put the sugar down where I showed you
