

Which shoe fits your banker?

Muddy shoes don't necessarily make a great banker. But unless your banker gets his shoes muddy, he hasn't taken the steps necessary to help your business.

Indiana National has been in step with Indiana's construction, coal mining and heavy equipment businesses longer than any other bank. That makes us better equipped to understand your needs.

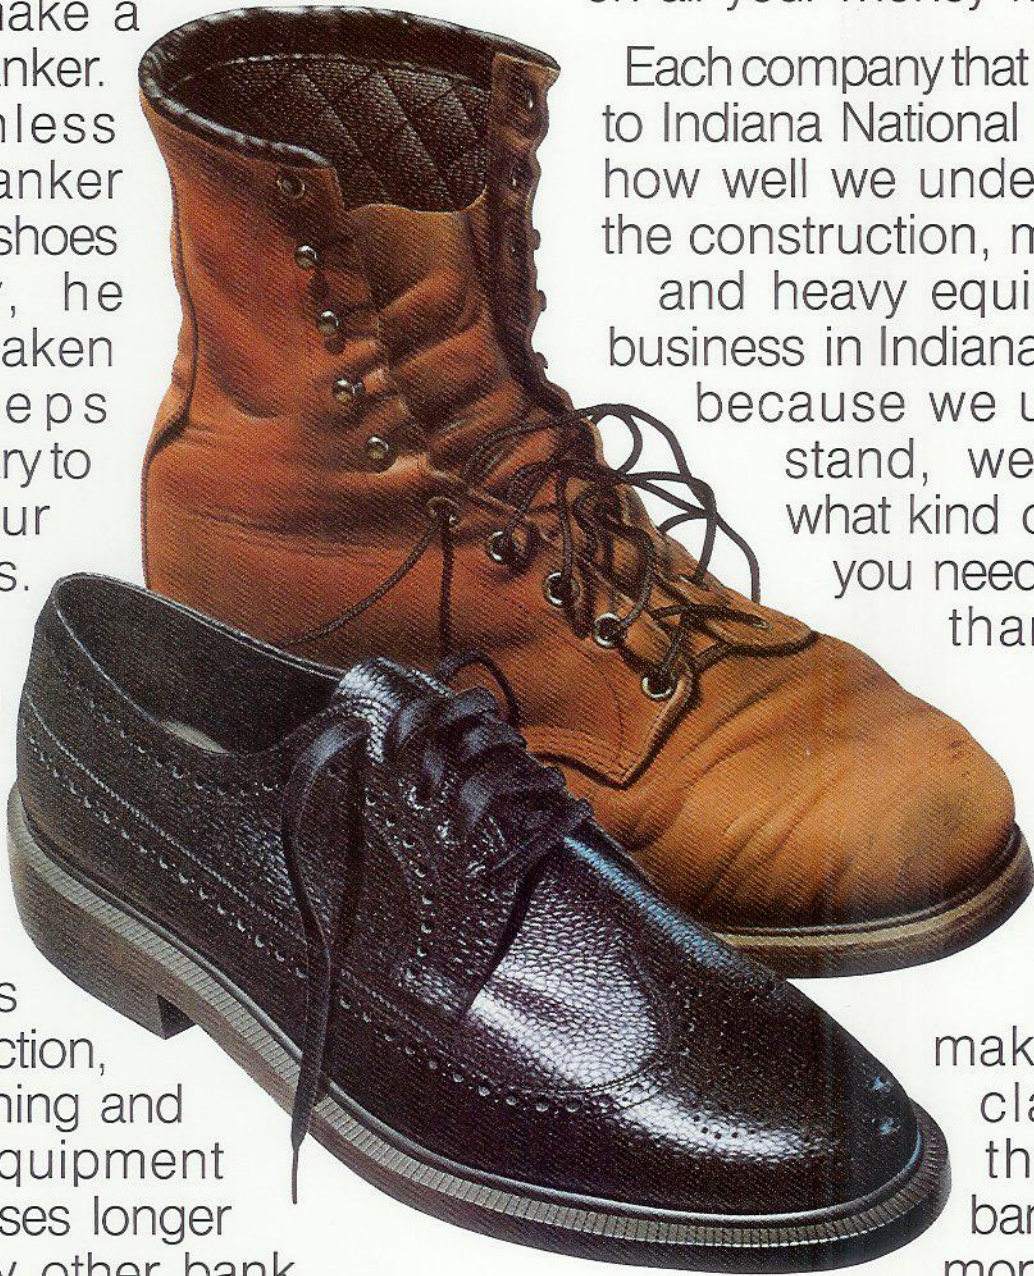

We go the extra mile to help you get around the red tape

you find at other banks. We give you all the advice and personal attention you need on all your money matters.

Each company that comes to Indiana National knows how well we understand the construction, mining, and heavy equipment business in Indiana. And because we understand, we know what kind of help you need better than any other bank.

Only one bank can make that claim — the one bank with more con-

struction and mining experience than any other.
